

BOUNCE N' CURLS
Shampoo For People Who Want More.

A Conceptual Campaign Project

#BounceBack WithCurls

Instagram Growth & Content Strategy
Case Study

by Aadhya Gupta

SECTION 1 — Project Overview

This case study documents the end-to-end development of **#BounceBackWithCurls** — a conceptual Instagram marketing campaign built entirely from scratch for an original hair care brand, **Bounce N' Curls**.

The project spans six strategic layers:

Layer	What It Covers
Brand Development	Identity, personality, color palette, product portfolio
Market Research	Problem identification, audience profiling, competitor analysis
Campaign Strategy	Concept, hashtag strategy, content mix, narrative
Execution Planning	Content calendar, visual direction, influencer strategy
Community Building	Engagement strategy, UGC, two-way communication
Measurement	KPIs, targets, tracking framework, budget

Every element — from the brand name to the campaign hashtag to the influencer creative brief — was independently researched, conceptualised, and produced without any external brief. This project reflects the ability to think and execute like a **marketing strategist** — not just a content creator.

SECTION 2 — Brand Overview & Snapshot

About Bounce N' Curls

Bounce N' Curls is a conceptual Indian hair care brand built around one unapologetic belief — that curly hair is not a problem to be fixed, but a personality to be celebrated.

In a market dominated by brands that treat frizz as the enemy and curls as something to be tamed, Bounce N' Curls takes the opposite stance — embracing texture, volume, and natural definition as strengths worth building an entire brand around.

The brand is designed to feel **aspirational yet deeply accessible** — speaking directly to young Indian women who have spent years using products not made for their hair type and getting results that prove it. Bounce N' Curls is built to be the first brand that actually understands them — their hair, their lifestyle, and their Instagram feed.

With an **Instagram-first identity**, every product, every post, and every campaign element is engineered for shareability — designed to look good on a feed and feel real in everyday life.

Brand USP

USP Pillar	What It Means
Made for Indian Hair	Formulated keeping Indian climate, texture, and specific hair concerns in mind
Curl-First Philosophy	Curl care is not a product extension — it is the entire brand foundation
Affordable Premium Feel	High-quality experience without luxury pricing — accessible to college-going women
Instagram-Native Brand	Visual identity built for digital-first discovery, sharing, and community building

Brand Personality

Bounce N' Curls does not sell perfection. It sells **confidence in your natural self**. The brand voice is warm, direct, and unapologetically real.

- **Confident** — Knows exactly what it stands for
 - **Stylish** — Aesthetically intentional at every touchpoint
 - **Youthful** — Speaks Gen Z without trying too hard
 - **Authentic** — Real hair, real people, real results, no filters on the values
-

SECTION 3 — Brand Color Palette & Identity

The visual identity is built on a palette that feels **premium, youthful, and distinctly feminine**, without being loud or overdone. Every Color serves a strategic purpose in building brand recognition across Instagram touchpoints.

Role	Color	Hex Code	Usage
Primary	Midnight Indigo	#20124F	Backgrounds, headers, hero elements
Secondary	Soft Lavender	#EDE9FE	Cards, highlights, section backgrounds
Accent	Warm Rose Gold	#C4977F	CTAs, icons, decorative details
Neutral	Warm White	#FAFAFA	Clean backgrounds, text areas
Text	Charcoal	#1C1C1C	Body text, captions, labels

Typography System

Type	Font	Purpose
Display	Playfair Display	Campaign titles, hero text — elegant and editorial
Body	Poppins	All body content — clean, modern, highly readable
Accent	Cormorant Garamond	Hashtag hero text, special callouts

Brand Identity – Bounce N' Curls

SECTION 4 — Product Portfolio

Bounce N' Curls offers five distinct product ranges, each serving a specific consumer need while staying rooted in the brand's curl-first philosophy. The portfolio is intentionally designed to guide a consumer through their **complete hair care journey**, from daily maintenance to salon-level treatment to everyday styling.

Visual : Bounce N' Curls Product Portfolio — AI-generated brand visualization

Range 1 — Core Range (Daily Use)

For the everyday hair care routine — the entry point into the brand

Product	Key Benefit
Bounce Volume Shampoo	Adds body and bounce without stripping moisture
Smooth Repair Conditioner	Detangles and softens while repairing damage
Daily Shine Serum	Lightweight shine without greasiness

Range 2 — Curly Hair Special Range (Hero Range — Brand USP)

The heart of the brand — built exclusively for curly and wavy hair

Product	Key Benefit
Curl Defining Shampoo	Cleanses while enhancing natural curl pattern
Curl Cream	Defines, moisturises, and holds curls without crunch
Frizz Control Gel	Tames frizz and locks in definition all day

Range 3 — Natural & Herbal Range

For the ingredient-conscious consumer seeking clean formulations

Product	Key Benefit
Aloe Hydration Shampoo	Deep hydration with soothing aloe vera
Onion Hair Fall Control Shampoo	Strengthens roots and visibly reduces breakage
Coconut Repair Oil	Intensive overnight nourishment and repair

Range 4 — Premium Salon Range

Elevating the brand into aspirational, luxury-adjacent territory

Product	Key Benefit
Keratin Smooth Shampoo	Smoothens and strengthens with keratin complex
Hair Spa Mask	Deep conditioning treatment for intense repair
Deep Repair Therapy Kit	Complete at-home salon experience

Range 5 — Styling Range

Completing the full hair care ecosystem beyond the wash routine

Product	Key Benefit
Heat Protection Spray	Guards against heat damage up to 230°C
Hair Mist	Refreshes and adds fragrance between washes
Volume Booster Spray	Instant lift and body for flat, lifeless hair

SECTION 5 — The Problem

India has one of the most diverse hair type demographics in the world, yet the mainstream hair care market has historically been built around **one hair type: straight, smooth, and manageable.**

For millions of Indian women with naturally curly, wavy, or coily hair, this has meant a lifetime of using products that were never designed for them and wondering why the results never match the promise on the packaging.

The problem runs deeper than formulation. It is a **representation problem.** Most hair care content on Indian Instagram centres around sleek blowouts, pin-straight styles, and transformation stories that begin with curls and end with straight hair, as though the curl itself is the problem being solved.

This has created a deeply underserved audience, **college-going women aged 18–25 with curly and wavy hair,** who are highly active on Instagram, acutely aware of their specific hair needs, and actively searching for a brand that speaks to them without asking them to change.

Pain Point	Reality
Wrong Products	Most mainstream products strip curl definition and cause frizz
Lack of Representation	Curly hair is underrepresented or shown as something to fix
No Trusted Brand	No strong Indian brand owns the curly hair identity authentically
Content Gap	Existing content feels aspirational and unrelatable
Information Gap	Limited access to reliable India-specific curl care education

SECTION 6 — The Solution

#BounceBackWithCurls was conceptualised as the direct answer to this gap — a campaign that does not just sell products but **fundamentally reframes the narrative around curly hair in India**.

Instead of positioning curls as something to manage, the campaign celebrates them as something to embrace. Instead of aspirational content that feels out of reach, it leads with **relatable, transformation-based storytelling** that reflects the real everyday experiences of its audience.

Pillar	What It Does	Why It Works
Transformation Content	Before-and-after narratives showing real, achievable results	Drives trust and purchase intent
Relatable Storytelling	College-life scenarios, everyday curl struggles, real moments	Creates emotional connection and shareability
Interactive Community	Polls, Q&As, and UGC that make audience feel like brand participants	Builds loyalty and organic reach

Together these three pillars position Bounce N' Curls not just as a hair care brand — but as **the curl community's home on Instagram**.

SECTION 7 — Target Audience

Primary Audience Definition

College-going females, aged 18–25, with curly or wavy hair, based in urban and semi-urban India.

Demographic Profile

Parameter	Detail
Age	18–25 years
Gender	Female
Location	Urban & Tier 1/2 cities — Delhi, Mumbai, Bangalore, Hyderabad, Pune
Education	Currently pursuing undergraduate or postgraduate degrees
Income	Dependent or early earner — price-conscious but invested in self-care

Psychographic Profile

Parameter	Detail
Interests	Beauty, self-care, fashion, Instagram, trending content
Values	Authenticity, self-expression, natural beauty, inclusivity
Pain Points	Frizz, dryness, undefined curls, lack of relatable content
Aspirations	Confident, effortlessly put-together appearance without excessive effort
Trust Signals	Before-and-after results, peer recommendations, micro-influencer reviews

Instagram Behaviour

Behaviour	Detail
Daily Usage	2–4 hours on Instagram daily
Primary Formats	Reels and Stories — short, visual, fast
Discovery Method	Hashtags, explore page, influencer recommendations
Purchase Trigger	Before-and-after content, honest reviews, relatable creators
Engagement Style	Saves tutorials, shares relatable posts, responds to polls actively

#BounceBackWithCurls

SECTION 8 — Competitor Analysis

Market Overview

The Indian curly hair care segment has grown significantly over the past three years, driven by the global **#CurlyGirlMethod** movement and increasing awareness around texture-specific care. However, the market remains fragmented — with no single dominant Indian brand authentically owning the curly hair identity.

Competitor 1 — Mamaearth

Parameter	Analysis
Positioning	Natural, toxin-free, safe for all hair types
Strengths	Massive brand recognition, wide distribution, strong influencer network
Weaknesses	Generalist — no curl-specific identity, mass-market feel
Instagram Strategy	Heavy influencer marketing, educational content, promotional offers
Core Gap	Does not speak specifically to curly hair audience — feels like everyone's brand

Competitor 2 — WOW Skin Science

Parameter	Analysis
Positioning	Science-backed, result-oriented hair and skin care
Strengths	Strong Amazon presence, credible formulations, professional packaging
Weaknesses	Cold and clinical personality — low emotional connection with Gen Z
Instagram Strategy	Product-focused content, before-and-after posts, limited community engagement
Core Gap	Lacks warmth and relatability — not built for Instagram culture or curl community

Competitor 3 — Pilgrim

Parameter	Analysis
Positioning	Global beauty secrets, ingredient-led formulations
Strengths	Strong D2C presence, aesthetically strong Instagram feed, good storytelling
Weaknesses	No dedicated curl range — targets broad audience without niche ownership
Instagram Strategy	Aesthetic content, ingredient education, influencer collaborations
Core Gap	Misses the curl community entirely despite strong digital presence

Competitive Comparison Matrix

Parameter	Mamaearth	WOW Skin Science	Pilgrim	Bounce N' Curls
Curl-Specific Range	Absent	Absent	Absent	Strong
Gen Z Relatability	Partial	Absent	Strong	Strong
Instagram-First Brand	Partial	Absent	Strong	Strong
Affordable Pricing	Strong	Partial	Partial	Strong
Indian Hair Focus	Strong	Partial	Absent	Strong
Community Building	Partial	Absent	Partial	Strong
Curl Education Content	Absent	Partial	Absent	Strong

Market Gap & Strategic Opportunity

No existing competitor simultaneously owns the **curl-first identity, Instagram-native brand experience, and Gen Z relatability** in the Indian market. Bounce N' Curls is positioned to fill exactly this white space — combining curl expertise, authentic storytelling, and community-driven marketing into one cohesive brand the target audience can genuinely call their own.

SECTION 9 — Campaign Concept

Campaign Theme — Hair Transformation

The central theme of **#BounceBackWithCurls** is transformation — not just physical, but emotional. The campaign captures the journey from **frustration with unmanageable, undefined curls** to the quiet confidence of knowing your hair is finally working with you, not against you.

This is not a traditional before-and-after campaign. It is about the **feeling of bouncing back**, reclaiming confidence, embracing natural texture, and finding a brand that finally delivers what it promises.

Campaign Hashtag

Function	Purpose
Brand Recall	Every use reinforces both the campaign and the brand name simultaneously
Community Builder	Creates a searchable, ownable space for UGC and community posts
Emotional Hook	"Bounce back" implies resilience and confidence — not just hair results
Campaign Identity	Unifying thread across all formats, creators, and touchpoints

Campaign Narrative

"Your curls have always been your superpower. You just needed the right brand to help them bounce back."

This narrative runs consistently through every piece of content — from transformation reels to educational carousels to interactive story polls — creating an emotional thread that builds brand loyalty over time.

SECTION 10 — Hashtag Strategy

A three-tier hashtag system maximises discoverability, targeted reach, and community building simultaneously — without relying on irrelevant or oversaturated tags.

Tier 1 — Branded Hashtags (*Brand Identity & Recall*)

Used on every single post without exception:

- **#BounceBackWithCurls** (*hero campaign hashtag*)
- **#BounceNCurls** (*brand hashtag*)
- **#BNCCurls** (*short brand code for community use*)

Tier 2 — Niche Hashtags (*Targeted Curl Community Reach*)

- #CurlyHairIndia · #WavyHairIndia · #CurlyGirlIndia
- #CurlsOfInstagram · #IndianCurlyHair
- #DefineYourCurls · #FrizzFreeLife · #CurlyHairRoutine

Tier 3 — Trending & Broad Hashtags (*Maximum Exposure*)

- #HairCareRoutine · #HairTransformation
- #BeautyTipsIndia · #CollegeGirlLife
- #SelfCareRoutine · #GRWMIndia

Hashtag Usage by Format

Format	Mix	Total
Reels	3 Branded + 5 Niche + 2 Trending	10
Posts	3 Branded + 4 Niche + 3 Trending	10
Stories	2 Branded + 1 Niche	3

10–12 highly relevant targeted hashtags significantly outperform 30 generic ones on Instagram's current algorithm — quality over quantity always wins.

SECTION 11 — Content Strategy

Content Mix & Purpose

Format	Funnel Stage	Strategic Role	Priority
Reels	Top of Funnel	Maximum organic reach and new audience discovery	Primary
Posts	Mid Funnel	Brand positioning, aesthetic consistency, save ability	Secondary
Stories	Bottom of Funnel	Community nurturing, direct interaction, loyalty building	Supporting

Format-Wise Content Direction

Reels — Reach & Discovery

- Before-and-after curl transformation videos
- Quick curl care tips under 30 seconds
- College morning GRWM with curl routine
- Trending audio used with curl care context
- Relatable POV content — *"POV: You finally found a product made for your curls"*
- Myth-busting — *"Stop doing this to your curls"*

Posts — Brand Building

- Educational carousels — *"5 reasons your curls are frizzy"*
- Product highlight posts — clean, editorial, aesthetic
- Curl type identification guides
- Infographics — curl care myths vs facts
- Testimonial-style quote graphics

Stories — Community & Engagement

- Daily polls — *"Wash day today or skipping it?"*
- Question boxes — *"Tell us your biggest curl struggle"*
- Behind-the-scenes brand content
- Quick tips and product reminders
- Reposting audience UGC with genuine personalised captions

Algorithm Rationale

Instagram's current algorithm rewards **saves, shares, and watch time** over surface-level metrics like likes. Every piece of content is designed with a specific behavioural trigger:

- Carousels designed to be **saved** for future reference
- Reels designed to be **shared** to stories
- Stories designed to drive **direct interaction** via polls and replies

SECTION 12 — Content Calendar

A structured **3-week content calendar** maintains a consistent 4-touch-per-week posting cadence — sustaining algorithmic reach without overwhelming the audience.

Week 1 — Brand Introduction

Table 1 — Content Plan

Day	Format	Content Idea	Hook
Monday	Reel	Brand Launch — "Meet Bounce N' Curls"	"Finally, a brand made for YOUR curls 💜"
Wednesday	Post	Carousel — "5 Signs You Need a Curl Routine"	"If your curls feel like this, keep reading 📌"
Friday	Reel	Curl Transformation — Curl Cream	"Before vs After — the difference is real"
Sunday	Story	Poll — "What's your biggest curl struggle?"	4-option interactive poll

Table 2 — Execution Plan

Day	CTA	Hashtag Tier
Monday	Follow for your curl glow-up	Branded + Niche
Wednesday	Save this for later	Branded + Trending
Friday	Comment your hair type below	Branded + Niche
Sunday	Reply to tell us more	Branded only

SECTION 13 — Visual Execution

All visual content is designed in **Canva** using the established brand Color palette — maintaining strict consistency across every touchpoint. The visual language is clean, editorial, and aesthetically intentional — designed to feel native to Instagram without looking generic or templated.

Bounce N' Curls – Hero Product
Curl Cream

Instagram Poll Mock Up

Instagram Profile Mockup

Instagram Story Mock Up

SECTION 14 — Influencer Strategy

Why Micro & Nano Influencers

Factor	Advantage
Trust	Smaller audiences have deeper personal relationships with creators — recommendations feel genuine
Engagement	Average 5–8% engagement rate vs 1–2% for macro influencers
Precision	Curl-specific micro influencers already have exactly the right audience
Cost Efficiency	Delivers authentic reach within a startup-level budget

Ideal Influencer Profile

Parameter	Criteria
Follower Range	5,000 – 50,000
Content Niche	Curly hair care, beauty, college lifestyle
Location	Indian — metro or Tier 1 cities preferred
Minimum Engagement Rate	4%
Audience Demographics	18–25 female majority
Content Style	Authentic, tutorial-based, relatable — not overly polished

Real Influencer Selection

Identified through Instagram hashtag research under #CurlyHairIndia and #WavyHairIndia — selected based on engagement quality, content authenticity, and audience alignment:

Creator	Follower Range	Niche	Why They Fit
@curlsforever.india	~12K	Indian curly hair tutorials	Highly engaged curl community, authentic review style, college-age audience
@wavyhairdiaries	~8K	Wavy hair routines, product reviews	Honest relatable content — strong save and share rates on tutorials
@delhicurlgirl	~5K	Delhi-based curly hair, college lifestyle	Hyper-local relevance, natural content style, exact target audience match

Collaboration Formats

Format	Details
Product Gifting	Send Curly Hair Special Range — request honest review reel
Paid Reel	30–60 second transformation using Curl Cream + Frizz Control Gel
Story Mention	3-slide story — unboxing, application, honest result
UGC Repurpose	Brand reposts creator content with credit on official handle

Budget Allocation

Type	Followers	Count	Cost Each	Total
Nano Influencer*	1K-10K	2	₹500	₹1,000
Micro Influencer	10K-50K	1	₹2,000	₹2,000
Total		3		₹3,000

*Nano influencers engaged via product gifting only — no paid fee

APPENDIX A - Influencer Creative Brief

SECTION 15 — Engagement Strategy

Engagement is treated as a **community-building tool** — not a vanity metric. Every interaction is a deliberate opportunity to deepen the relationship between the brand and its audience.

- **Daily story polls** keep the audience habitually interacting — low effort, high frequency
 - **Question boxes** surface real curl concerns that directly inform future content ideas
 - **Reaction sliders** provide quick frictionless engagement touchpoints that boost story algorithm
 - **Countdown stickers** build anticipation for product highlights and campaign reveals
 - Every comment receives a **personalised reply within 24 hours** — never a generic emoji response
 - DMs from audience members are responded to warmly — noted for potential UGC or content ideas
 - Product questions in comments are answered with genuinely helpful information — positioning the brand as a **curl expert, not just a seller**
 - Audience transformations using #BounceBackWithCurls are reposted with genuine personalised captions
 - Permission is always sought before reposting — this action itself builds deep trust
 - Language like "our curl community" and "curl fam" used consistently — creates belonging
-

SECTION 16 — KPIs & Expected Impact

Campaign success is measured across five core metrics with specific, realistic targets — and projected outcomes set for a **30-day campaign window**.

Starting baseline: 0 followers (new brand launch). 30% month-on-month growth target post-launch.

KPI	Target	Expected Outcome
Follower Growth Rate	+30% in 30 days	Organic + paid amplification combined
Engagement Rate	5–8% per post	Niche audience + high-relevance content
Reel Average Views	10,000+ per Reel	Hashtag strategy + trending audio usage
Story Interaction Rate	20–30% per story	Daily polls + Q&As driving habitual interaction
Hashtag UGC Posts	50+ posts in 30 days	Influencer seeding + community participation
Influencer Reach	60,000–1,00,000 accounts	3 creator partnerships combined audience

Tracking Frequency

Frequency	What Gets Tracked
Daily	Story interactions and follower count
Weekly	Engagement rate, Reel performance, top content
Monthly	Full campaign audit — what worked, what did not, what to iterate

SECTION 17 — Estimated Budget

Expense	Purpose	Amount
Canva Pro	Design templates, brand kit, unlimited exports	₹500
Paid Promotions	Instagram Boost for top-performing Reels and Posts	₹2,000
Influencer Collaboration	Nano + micro influencer partnerships — 3 creators	₹3,000
Total		₹5,500

Budget Philosophy

This budget reflects a **micro-brand launch mindset** — prioritising organic growth through content quality and community engagement, supplemented by strategic paid amplification of content that has already proven organic traction. Every rupee is allocated to either **creating content or amplifying it** — nothing is wasted on untargeted reach.

Estimated Budget

#BounceBackWithCurls

SECTION 18 — Tools Used

Tool	Category	How It Was Used
Canva	Design	Post mock-ups, content calendar, brand identity board, product grids, KPI dashboard
Claude AI	Strategy & Ideation	Campaign concept, content ideation, creative brief drafting
ChatGPT	Content Writing	Caption drafting, hook generation, copy refinement
Meta Business Suite	Scheduling & Analytics	Content scheduling simulation and performance tracking framework
Instagram Insights	Performance Tracking	Engagement, reach, impressions, and story interaction metrics
Google Trends	Market Research	Trending topics and hashtag opportunity identification in hair care

SECTION 19 — Personal Reflection

What I Learned

This project pushed me to think far beyond Instagram posts. Building Bounce N' Curls from a brand name to a full campaign strategy taught me that **great marketing starts long before the first piece of content is created.**

Understanding the audience, identifying the market gap, studying competitors, and building a cohesive brand identity — these are the real foundations. Content is just the most visible layer of a much deeper strategic structure underneath.

I also learned that **specificity is everything in marketing.** The more precisely you define who you are talking to, the more powerfully your message resonates. Bounce N' Curls does not talk to everyone — it talks to one specific woman — and that is exactly what makes it compelling.

What I Would Do Differently

With a real budget and brand, I would invest in **actual product photography and packaging design** from the start — because visual assets are the single biggest differentiator between a concept and a brand that consumers actually trust.

I would also build a **pre-launch waitlist strategy** — using a link-in-bio landing page to capture audience interest before the first post goes live, generating anticipation rather than starting from zero on launch day.

Skills This Project Developed

Skill	How It Was Applied
Brand Strategy	Built complete brand identity from scratch — name, personality, USP, palette
Market Research	Identified real gap in Indian curly hair care market through competitor analysis
Content Strategy	Designed three-format Instagram strategy with algorithm rationale
Influencer Marketing	Developed real creator selection and professional creative brief
Campaign Planning	Built 3-week content calendar with hooks, CTAs, and hashtag sets
Budget Management	Allocated ₹5,500 across three channels with clear ROI rationale
Portfolio Documentation	Structured end-to-end case study for professional portfolio presentation

CLOSING PAGE

This case study represents more than a campaign — it represents a **complete way of thinking about marketing**.

Every section reflects the belief that good marketing is not about shouting the loudest — it is about saying exactly the right thing, to exactly the right person, at exactly the right moment, on exactly the right platform.

Bounce N' Curls was built from zero. Every product name, every strategic decision, every piece of content direction, and every word of this case study was independently conceived and developed — reflecting practical skills in branding, digital marketing, content strategy, influencer marketing, and strategic thinking that go well beyond classroom theory.

This is an independently developed conceptual project created as part of a personal marketing portfolio. All brand names, products, campaign elements, and strategic frameworks are entirely original.
